

Orona

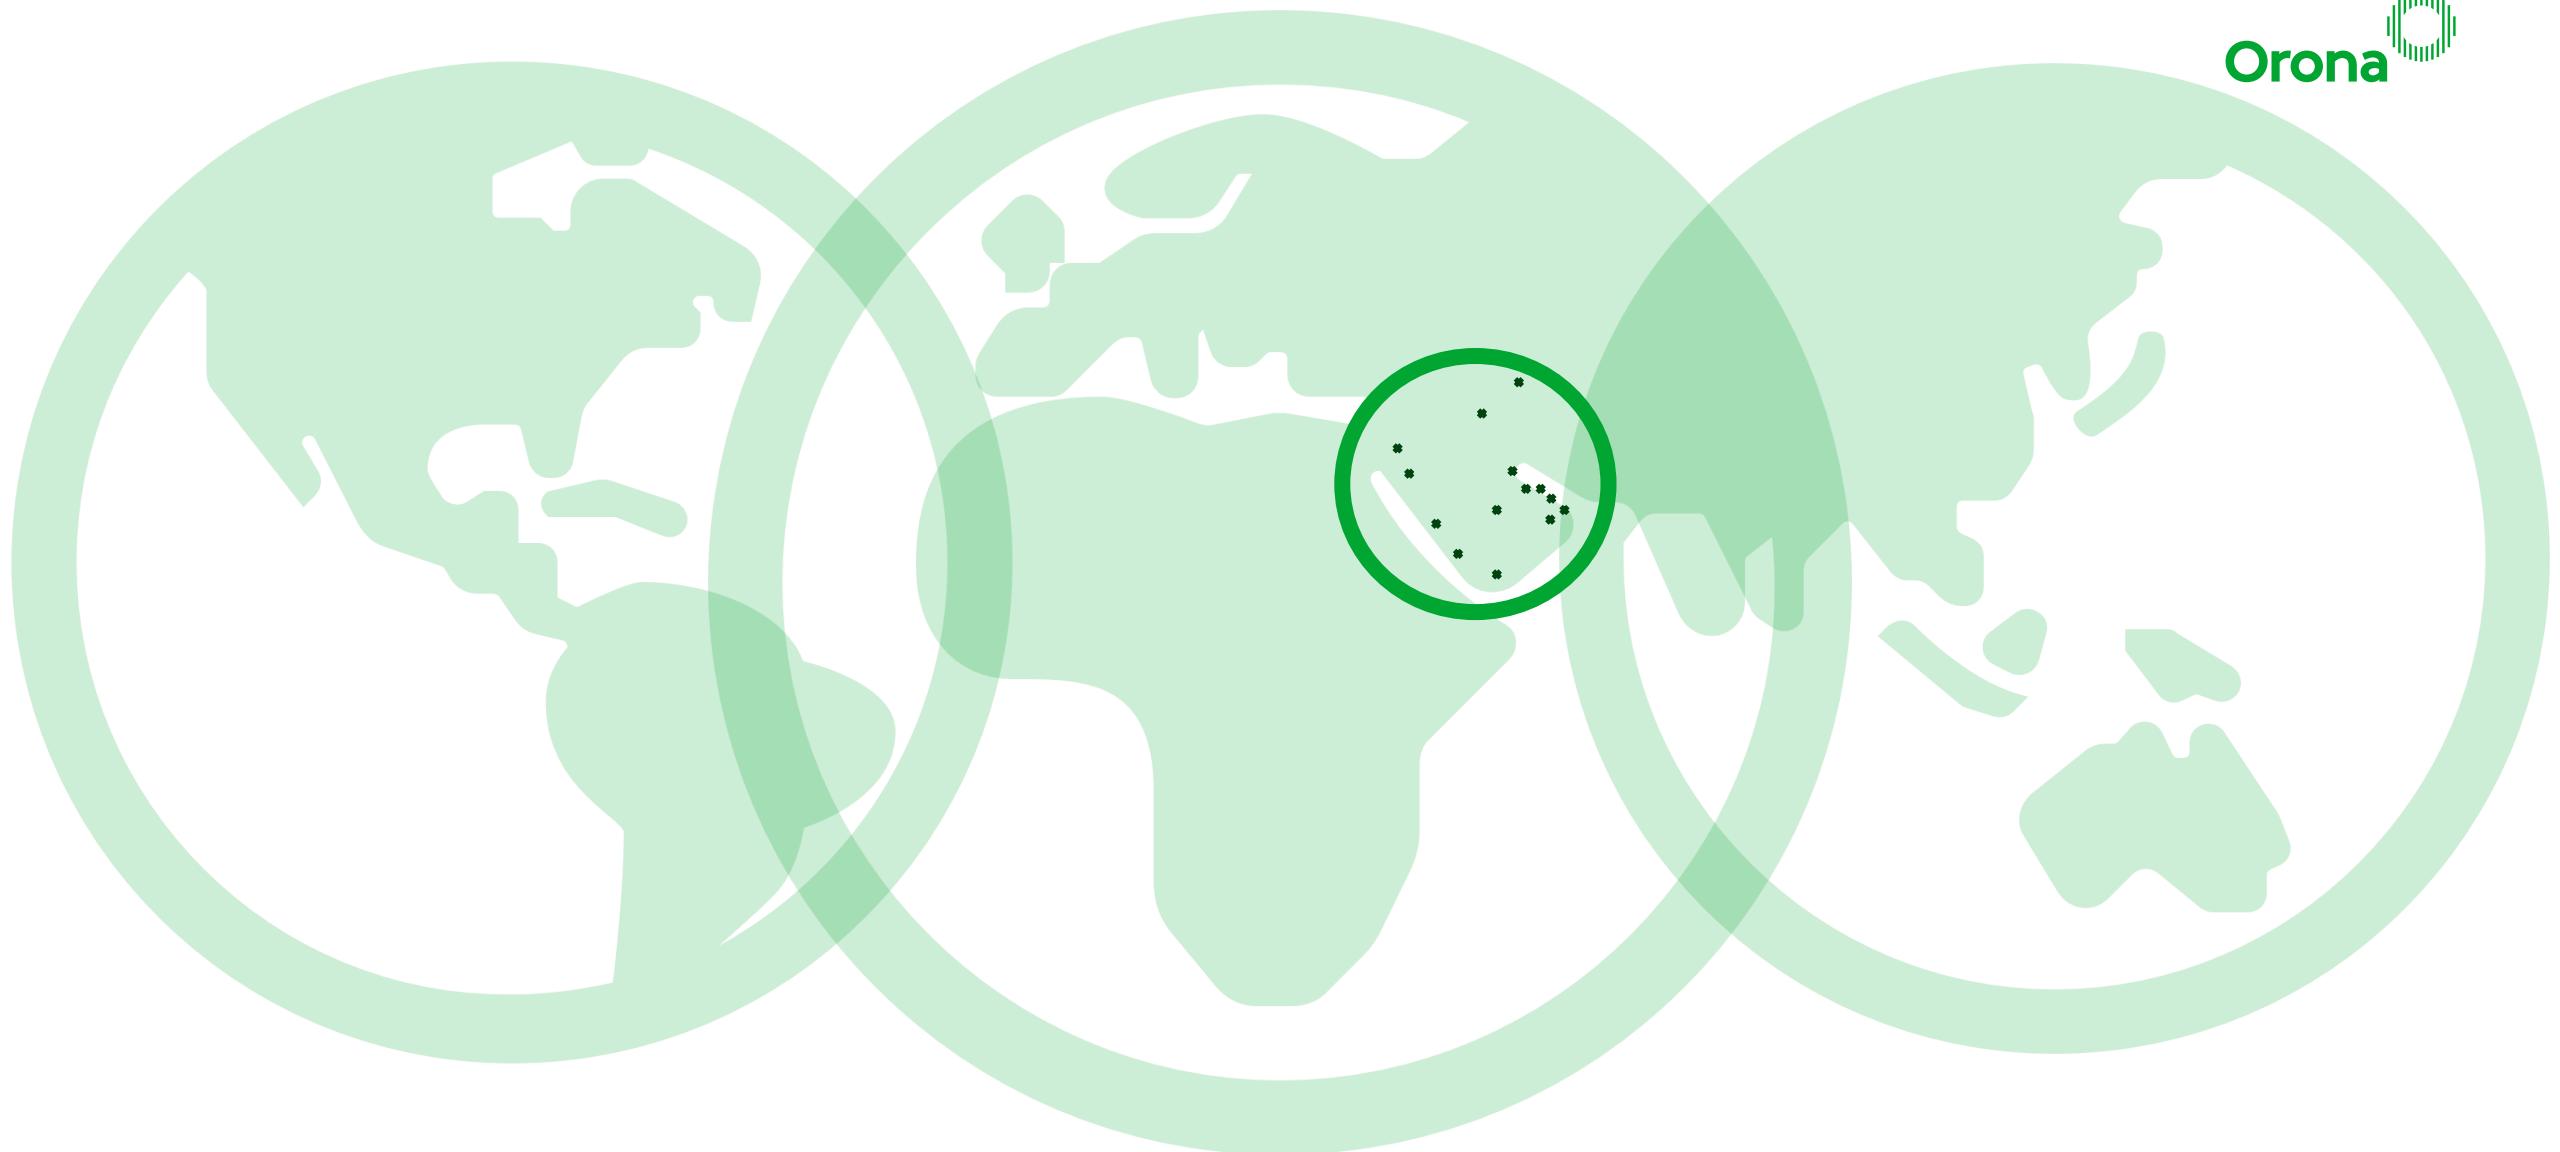

Orona

■ We offer a full service in **12 countries** - more than 140 offices

■ We are present in more than **100 countries** through our distributors

A truly international company, Orona has been working with our partners throughout the Middle East for over 20 years

Production plants

2 production plants in Europe, spanning over 36,000 m2.

Located in the north of Spain, near the border with France.

Orona is **NUMBER 1** in Europe for complete lift production capacity: **30,000 lifts/year**

Production plants

Located in San Sebastian and Vitoria, two cities in Northern Spain.

San Sebastian has stunning coastlines and is a culinary paradise, renowned for its world-class gastronomy, with numerous Michelin-starred restaurants.

Vitoria has rich culture that offers a blend of medieval architecture and modern art.

San Sebastian

Vitoria

Production plants

+450

A workforce of more than 450 people.

Structured to meet tight supply deadlines

Orona Hernani

Orona Vitoria

Production plants

Organised into **self-managed mini-factories** that incorporate their own engineering, stock logistics, materials processing and quality control:

- Cars
- Controllers
- Car frames
- Machines
- Doors
- USM (materials supply unit)

Innovation

Orona Ideo

Pioneering ecosystem of innovation in Europe with the Business, University and Technology Centre.

Our Technology Centre is where the latest technologies in vertical transport, sustainability and energy efficiency are applied.

First set of buildings in Europe to obtain LEED Gold and BREEAM Excellent.

Sustainability at Orona

Our way of being and doing

ORONA is the first company in the lift sector worldwide certified in Eco-design (ISO 14006).

Ecodesign is an approach to designing products with special consideration for the environmental impacts of the product during its whole lifecycle.

Agenda 2030

We firmly believe in the power of our contribution to improving sustainability and the 2030 agenda via the SDGs, set by the United Nations.

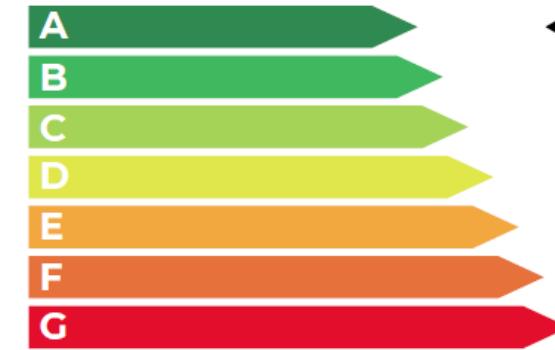

This commitment is embodied in specific sustainability goals to be achieved by 2030.

Orona's green

Energy efficiency of elevators

Orona Next solutions have obtained **Class AAA energy certification** according to VDI/ISO thanks to the high energy efficiency obtained with LED lighting and the stand-by system when the elevator is at rest.

 A ISO 25745:
Orona Next Essentia
Orona Next Smart

An elevator can account for up to 80% of the electricity consumption of a building owner

Commitment to eco-efficiency

Evolution of the energy consumption in Orona lifts

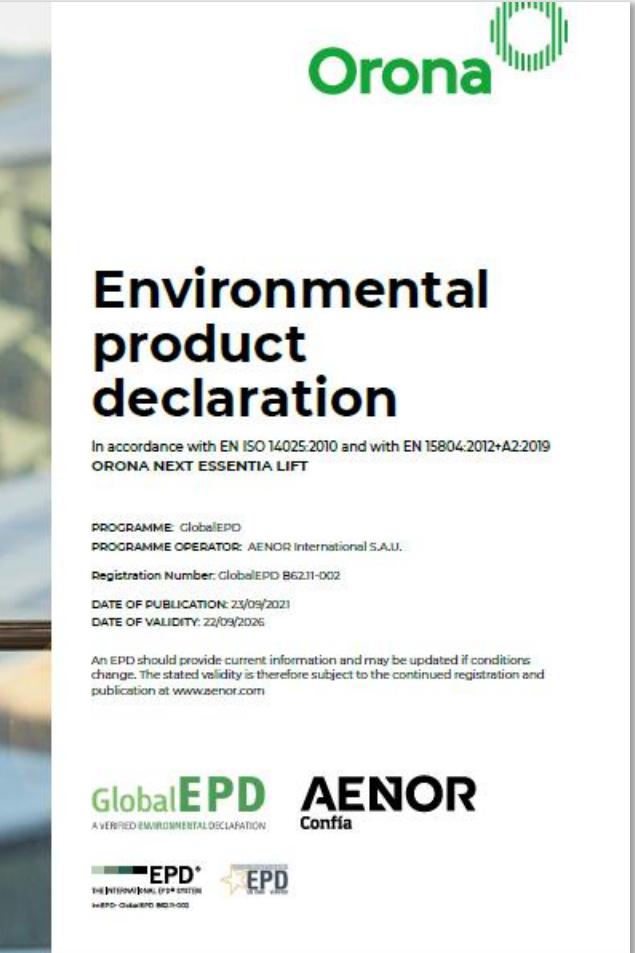

+75%
reduction since
2008

Orona Next Solutions

Orona Next

The solutions are structured in 6 series:

Orona Next Essentia Lift

Functionality and comfort at your fingertips

4 to 8 people
14 stops

Orona Next Smart Lift

Tailor-made comfort

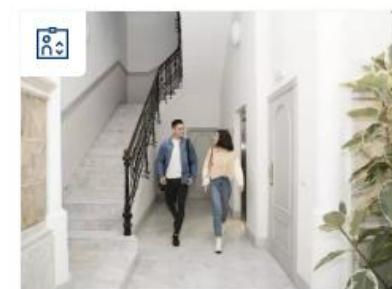

4 to 13 people
21 stops

Orona Next Smart+ Lift

+ fast, + strong, + high

8 to 33 people
32 stops

Orona Next Flex Lift

Fits in any opening

2 to 8 people
14 stops

Orona Next Cargo Lift

The strongest of the series

1000 to 7000 kg

Orona Next Rise lift

Solution for high-rise buildings

6 to 21 people
64 stops

Move more smoothly within buildings

Move freely within the building thanks to various forms of access, destination selection and access control.

- **Easy Flow:** Optimising people flow and reducing energy consumption, it is the solution for high-traffic facilities with several lifts. Once the user selects their destination, the system informs them of which lift to take, thus reducing wait time and optimising the overall travel time.

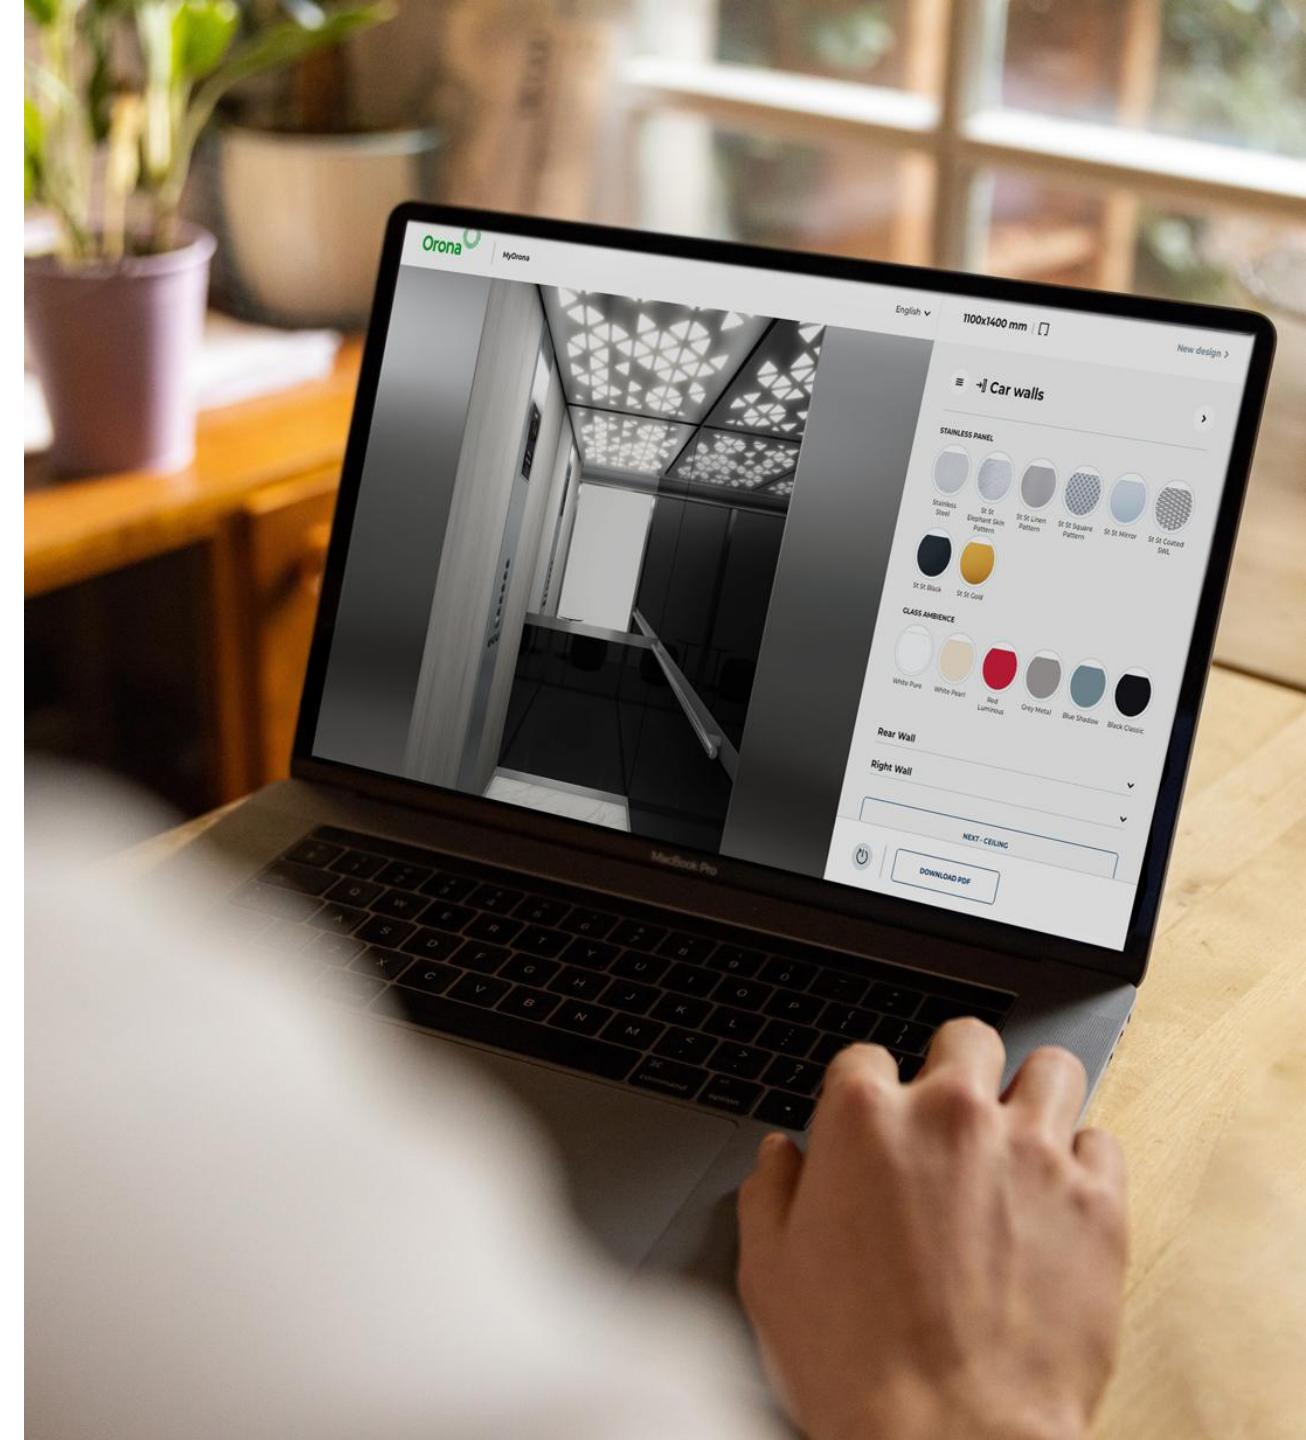

Orona Ambiences

Design your lift car interior

Customize your experience with all the details with the variety of finishes and options available.

Choose from a wide range of pre-designs or create a design according to your style.
